

MUNICIPAL ELECTRIC SYSTEMS OF OKLAHOMA

Basic Lineman School

This two-fold training course begins with classroom training sessions (which will cover the basics of electricity), lively discussions and a supporting workbook loaded with reference materials and classroom activities. The classroom session is followed by hands-on instruction performed outdoors, where a variety of conventional and not-so conventional equipment is placed in the hands of workshop participants.

This training will assist workers whose job assignments may require pole climbing, assisting journeymen and operating mechanical equipment. While this course covers BASIC materials and is designed for Apprentice Linemen, professionals at any skill level or knowledge will benefit by participating.

June 12-13, 2018

OMPA Fairview Field Office

Fairview, Oklahoma
