Welcome to Our Future!

On April 15, 2019 during the association’s Annual Meeting, the members voted unanimously to change our association’s name and expand our services.

Effective July 1, we are the Oklahoma Municipal Alliance. With the name change comes the added directive of providing high quality training for municipal enterprise departments - electric, water, wastewater, natural gas, broadband, and solid waste.

Starting with water and wastewater, we will conduct training events around the state. These training events are open to all municipal water and wastewater professionals. As opportunities, topics, speakers and needs are identified, we’ll develop more training opportunities across the state.

Our Mission remains the same: “To enhance our members’ value to their customers through industry best-practice programs, training and services.”

I look forward to your active engagement on this journey we share together.

Tom Rider
General Manager

The Roles of Congressional Staff

Each member of Congress has a staff to assist him/her during a term in office. To be most effective in communicating with Congress, it is helpful to know the titles and principal functions of key staff.

**Commonly used titles and job functions:**

**Administrative Assistant (AA) or Chief of Staff (CoS):** The AA reports directly to the member of Congress. He/She usually has overall responsibility for evaluating the political outcomes of various legislative proposals and constituent requests. The AA is usually the person in charge of overall office operations, including the assignment of work and the supervision of key staff.

**Legislative Director (LD), Senior Legislative Assistant, or Legislative Coordinator:** The LD is usually the staff person who monitors the legislative schedule and makes recommendations regarding the pros and cons of particular issues. In some congressional officers there are several LD’s and responsibilities are assigned to staff with
Effective lines of communication between the particular expertise in specific areas. For example, depending on the responsibilities and interests of the member, an office may include a different LD for health issues, environmental matters, taxes, etc.

**Press Secretary** or Communications Director: The Press Secretary’s responsibility is to build and maintain open and effective lines of communication between the member, his/her constituency, and the general public. The Press Secretary is expected to know the benefits, demands, and special requirements of both print and electronic media, and how to most effectively promote the member’s views or position on specific issues.

**Appointment Secretary, Personal Secretary, or Scheduler:** The Appointment Secretary is usually responsible for allocating a member’s time among the many demands that arise from congressional responsibilities, staff requirements, and constituent requests. The Appointment Secretary may also be responsible for making necessary travel arrangements, arranging speaking dates, visits to the district, etc.

**Caseworker:** The Caseworker is the staff member usually assigned to help with constituent requests by preparing replies for the member’s signature. The Caseworker’s
responsibilities may also include helping resolve problems constituents present in relation to federal agencies, e.g., Social Security and Medicare issues, veteran’s benefits, passports, etc. There are often several Caseworkers in a congressional office.

Other Staff Titles: Other titles used in a congressional office may include: Executive Assistant, Legislative Correspondent, Executive Secretary, Office Manager, and Receptionist.

Associate Opportunity

As a trade association, we provide a wide variety of services to member utilities in Oklahoma and various systems in neighboring states. In addition, we have many corporate associate members who show their support for public power through their support.

Our Associate Memberships are $350.00 annually.

For this, firms receive...

- A listing in the monthly OMA Newsletter.
- An alphabetized listing and full-page advertisement in our 4.25" x 7" pocket directory
- As well as reference when members call our office for information.

Associates also receive opportunities to exhibit their products/services at conferences and they receive preferences for speaking engagements on various topics of interest to our members.

If this is something you and your company are interested in being a part of please contact Deborah Miner-Gonzales at deborah@okmainc.com.

GridLiance High Plains (GridLiance) is an independent transmission-only utility. GridLiance partners with electric cooperatives, public power, and others to plan for the future of the grid, invest in transmission infrastructure, improve grid reliability, and unlock the value of existing transmission assets. GridLiance, and its sister utility GridLiance West, own 600 miles of transmission line and substations in Missouri, Nevada, and Oklahoma. The company also has long-term partnerships with utility partners operating in Missouri, Oklahoma, Nevada, and Kansas, including the Oklahoma Municipal Power Authority. Since 2014, GridLiance’s partnerships have driven reliability improvements and the replacement of aging transmission infrastructure. For more information about GridLiance, visit gridliance.com.
